k. Description of Request: The licensee requests a temporary variance of its minimum pool requirements in Florence Lake and its minimum flow requirements in the South San Joaquin River below Florence Lake. Specifically, the licensee requests Commission approval to reduce Florence Lake reservoir levels to as much as 10 percent below the minimum pool elevation requirement of 7232.6 feet msl. In addition, the licensee

requests Commission approval to reduce flows below Florence Lake below the 11 cubic feet per second (cfs) minimum flow requirement and/or the alternate inflow matching requirement during inflows less than 11 cfs. The licensee instead proposes to approximate flow releases with lake inflows, with occasional departures from the minimum flow requirement, but to maintain flows above 3 cfs. The licensee requests the variance as a result of low lake storage resulting from ongoing drought conditions at the project. Finally, the licensee requests the variance from November 8, 2021 through March 31, 2022.
